SUMMARY

Passionate and detail-oriented React.js developer with 8 months of hands-on experience building responsive, user-friendly web applications. Proficient in JavaScript, React Hooks, Tailwind CSS, and REST API integration. Skilled in component-based architecture, state management, and modern UI/UX practices. Eager to contribute to dynamic teams and build scalable, high-performance frontends.

PROFESSIONAL EXPERIENCE

Frontend Developer (React.js)

Codesmiths– Ahmedabad

February – Present

- Built responsive and dynamic user interfaces using React.js, JavaScript, and Tailwind CSS, improving user experience and accessibility.
- Developed and maintained modular, reusable components using functional components, React Hooks, and context API for efficient state management.
- Integrated RESTful APIs to fetch and display real-time data, ensuring seamless backend-frontend communication.
- Used React Router for navigation and client-side routing to create a smooth single-page application (SPA) experience.
- Used Git and GitHub for version control and collaborated via pull requests, code reviews, and issue tracking.

PROJECTS

Aksa by iSecurify – Cybersecurity Platform
- Built responsive dashboards using React.js and Tailwind CSS for real-time log monitoring.
- Integrated RESTful APIs to display system health and activity data.
- Implemented form validation with Formik and Yup for reliable data input.

Habitat (U.S. Law Firm Project)
- Developed attorney and client management interfaces using React.js and React Router.
- Created reusable UI components and ensured responsive design with Tailwind CSS.
- Collaborated via Git/GitHub for version control and code reviews.

E-Commerce Website
- Designed and developed a dynamic product listing and cart system using React.js and Context API.
- Integrated RESTful APIs for real-time product data and smooth user interaction.
- Optimized responsiveness and performance to enhance the overall shopping experience across devices.
